# More information about us

CYBER ONE

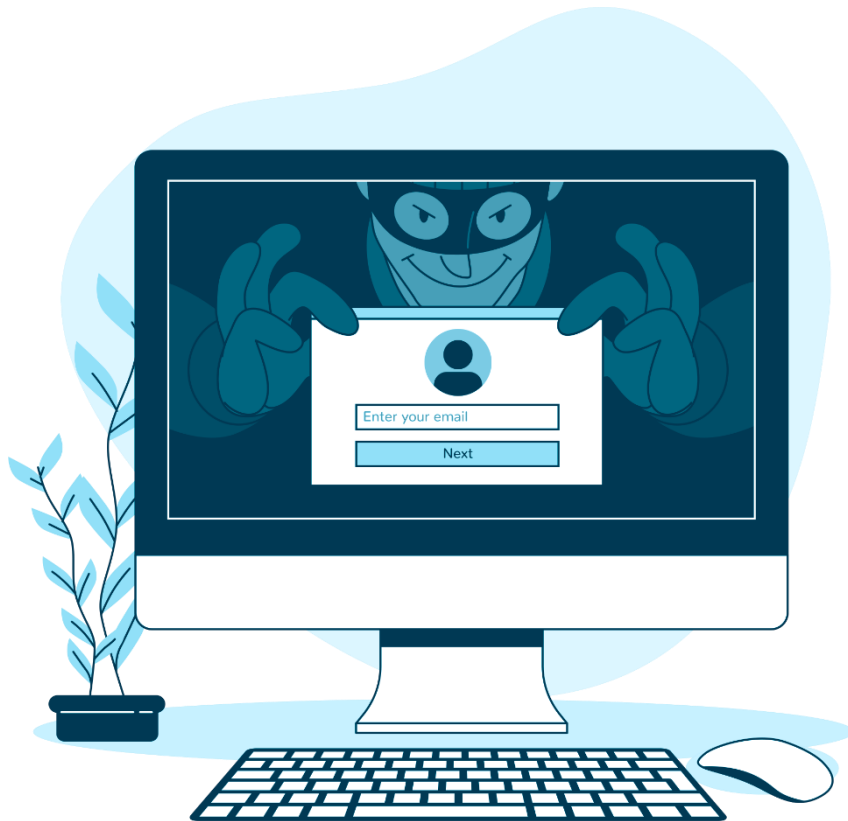

CYBERONE is a company founded by Israeli and Bulgarian cybersecurity specialists in 2018. The company provide Israeli know-how and variety of technological solutions related to cybersecurity and information technology. The main priority of the company is the successful and effective provision of cybersecurity solutions to businesses in Europe.

Since 2019 the company established their own advanced Security Operation Center in Sofia, Bulgaria. Together with our partners we strive to provide quality cybersecurity and IT services. In addition, we provide complete software and hardware solutions for Cybersecurity and data protection.

# What we are trying to solve

Cybersecurity is becoming immutable part of every company's business processes with each passing year. Whether you operate with critical information or not your company could become an object of a targeted or accidental hacker attack. Building information security in your company is not a single action but a long and complex process. Our specialists will try to simplify this process for you.

Malicious hackers are not only cable of exfiltrating data and assets of the company but also can access huge amounts of money, confidential financial documents, contracts and customer databases. Also they often manage to gain full remote control over the company's networks and systems. This practically means that they can penetrate anywhere, steal and manipulate documents as well as blocking all company activities.

# How can we protect you?

CYBER ONE

## Passive protection

Implementation of mechanisms for passive control and protection of IT infrastructure
